

Speed Change Pallet System

**Universal
Base**

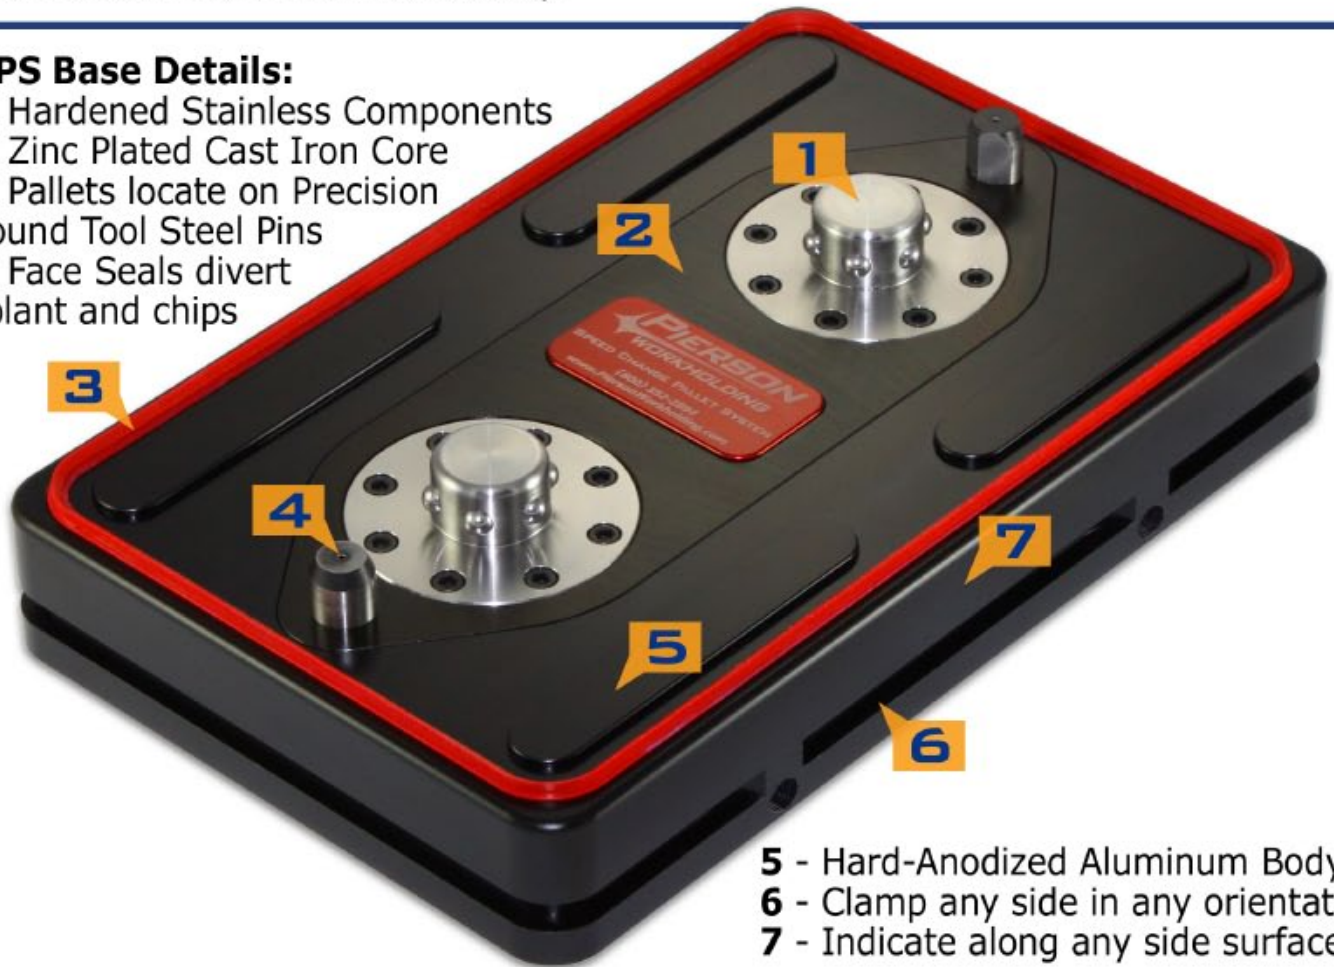

Pallets

The **Speed Change Pallet System** is a manual pallet changer designed to increase production by moving more parts in and out of the machine faster than traditional workholding. The **SCPS Base** provides 3000 lbs of holding power. The failsafe system is spring powered to lock (not vacuum) and uses air to release pallets. The combination of cast iron and hard-anodized aluminum construction ensures excellent rigidity, tough wear resistance and thermal stability.

SCPS Base Details:

- 1 - Hardened Stainless Components
- 2 - Zinc Plated Cast Iron Core
- 3 - Pallets locate on Precision Ground Tool Steel Pins
- 4 - Face Seals divert coolant and chips

- 5 - Hard-Anodized Aluminum Body
- 6 - Clamp any side in any orientation
- 7 - Indicate along any side surface

SCPS Pallets - Pallets range in size from 8"x12" to 10"x16" and locate with .0002" repeatability. 6061-T6 Extruded Aluminum assures easy machinability. The bottom locking surfaces use hardened stainless steel for long life.

SCPS Starter Package

SCPS Starter Package:

Streamline your purchase with an SCPS Starter Package which contains everything you need to be up and running within minutes of opening the box. We've even discounted the system so you know it's a smart buy.
